

8c - Microbes

Created by Dr J E F Frost with EclipseCrossword by Green Eclipse Software — www.eclipsecrossword.com

Across

2. A chemical that kills bacteria. (10)
5. A nutrient jelly for growing bacteria. (4)
7. Single celled fungi important for their ability to ferment carbohydrates. (5)
8. A solid yellow food made from milk. (6)
12. To inject a weakened form of a disease so as to create immunity to the disease. (11)
14. A mass of bacteria growing in a Petri dish. (7)
16. Tiny, microscopic organism usually a type of bacteria. (7)
17. A clear shallow container for growing bacteria(5,4). (9)
18. Tiny, microscopic life form. (13)

Down

1. A simple organism that can only reproduce within a living plant or animal cell. They often cause disease. (5)
3. An often poisonous, mushroom shaped fungus. (9)
4. A method of stimulating resistance to diseases in the human body using microbes. (11)
6. A famous antibiotic discovered by Alexander Fleming. (10)
9. A disease that spreads rapidly through a population. (8)
10. A simple plant that lacks green chlorophyll. Athlete's foot is caused by one of these. (6)
11. Primitive single celled organisms (8)
13. Increased resistance to a particular disease. (8)
15. The result of disease causing bacteria entering the body. (9)
